

Questions submitted by HC Chairman Skip Goerner to Kraig McLane, SJRWMD on Jan. 21, 2015.

1. How many acres were farmed?
2. What were the original elevations of the farmed land?
3. How much subsidence?
4. When the farms were operating, how did water from rainfall get from the North Shore to Lake Apopka?
5. How important is the drainage basin size to the recharge of Lake Apopka?
6. How much rain water now gets from the North Shore to Lake Apopka?
7. Is a pumping station or facility being constructed on the North Shore for irrigation for the city of Apopka?
8. Within the area that the MFLs are being developed how much water is being pumped from the aquifer? Include all CUPs (Consumptive Use Permits) and estimated use for private wells and irrigation.
9. How much water, from the Harris Chain including Lake Apopka, is being pumped from surface water. Include both permitted (CUPs) and estimated personal irrigation for homeowners.
