

Harris Chain of Lakes Restoration Council  
Tavares, Florida

September 30, 2008

Greetings,

Attached please find the second draft of the Harris Chain of Lakes Restoration Council's 2008 Report to the Legislature.

The second draft was developed based on comments made by the Council and TAG during the 9/12/08 meeting and subsequent comments made electronically via email. The overall consensus was to make the report shorter, easier to read, and to provide greater impact in the Executive Summary. In doing so, the report has been reformatted to include new sections and grouping of restoration technologies. Some of these new sections may still require additional language.

Many of the opinions and comments expressed by Council and TAG members during the monthly meetings are reflected in the report. Every attempt has been made to accurately convey those opinions, in support of the Council's objectives. Edits and comments provided by Council members and the TAG have been incorporated into the report. The italicized font indicates new language in the report which has not been previously reviewed. Text which is underlined or in color simply aids in review of the report and the draft report should be printed in black and white.

The timely review and comments by those involved are greatly appreciated. Additional review, comments, and edits are anticipated as we move toward the final report.

Sincerely,

Patrick F. Hunter, CFEA, LEP  
Recording Secretary
