**Harris Chain of Lakes Restoration Council**

**Workshop Discussion items**

**Jan. 18, 2019**

1. District to make a presentation on the Lake Apopka Innovative Total Phosphorus Removal Project for \$1.16 million. Update Council on how the P will be removed.
2. Identify septic systems around Lake Apopka with the potential of the systems to release harmful effluents into Lake Apopka(DEP?). In the future identify other septic systems that put harmful effluents in the rest of the Harris Chain.
3. Update Council on the Doctors Lake projects presented by the District in Aug. 2018 that improves water quality entering the Doctors Lake from septic systems, etc. FDEP to collaborate with results obtained YTD with the District's Doctors Lake Water Improvement Project presented to the public on 8/15/18 at Orange Park, Florida. Funding for the Doctors Lake Project was \$4.5 million. Information and results obtained by the District can be applied to the Harris Chain to provide onsite nutrient reduction in septic systems and utilize new technology to reduce nutrients in wastewater effluent.
4. Make a presentation to Council on the District's issuance of a new memorandum on Water Quality (Update to Memorandum 56 authored by Roland Fulton).
5. Review SJRWMD projects not only from a financial perspective but also from the science behind why the project was proposed. Discussion to include if results expected were the results obtained. Council would review projects bi- annually.
