

## Recommendations to 2019 Council Report

### **1. Homeowner Septic Systems**

Request Florida State Legislature to pass legislation that provides for inspection and correction of home septic systems that don't function correctly. Currently there is no requirement for inspections and it is estimated that 10-20% of the 2,500,000 individual systems in the state of Florida have failed.

### **2. Hydrilla in Harris Chain**

Provide additional funding for hydrilla treatment in the Harris Chain. Current funding controls hydrilla, additional funding can keep hydrilla growth to a minimum but can't eradicate hydrilla in the Harris Chain.

<sup>TAG</sup>  
~~State Legislature~~ to provide advance funding to identify a new herbicide to eradicate hydrilla. Hydrilla may become immune to current herbicides.
